

PARWAR d.o.o

Verjamemo v nove tehnologije in patentirane rešitve.

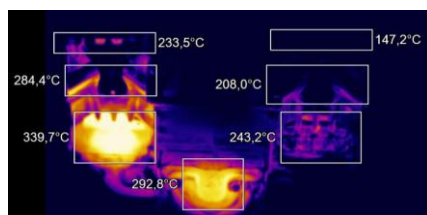

Zastopamo proizvajalca specialnih in patentiranih jekel in kovinskih prahov za 3D printanje Rovalma. <https://rovalma.com/>

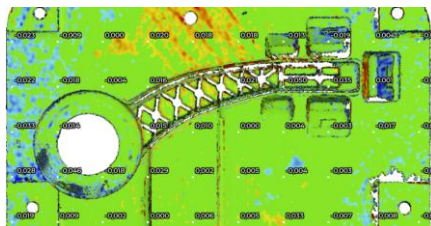

Z znanjem in izkušnjami pomagamo pri implementaciji le teh, v proizvodne procese z namenom privarčevanja energije, stroškov dela in materiala.

Naša pot dela sledi od konstrukcije, simulacije, izdelave, vzdrževanja, popravila in zaščite orodja iz jekel Rovalma.

Z našimi znanjem in pripravami za 3D skeniranje, meritev temperature in napravami za kontroliran hlajenje, uvajamo inovativne tehnološke pristope obvladovanja temperature v orodjih za vse tehnologije preoblikovanja kovin in drugih materialov.

PARWAR d.o.o

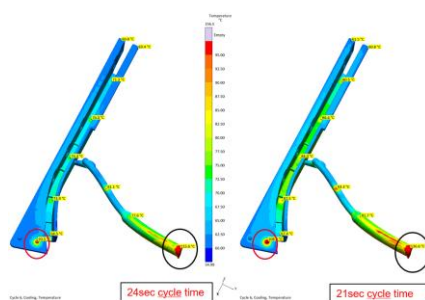

We believe in new technologies and patented solutions

We represent the manufacturer of special and patented steels and metal powders for 3D printing Rovalma.

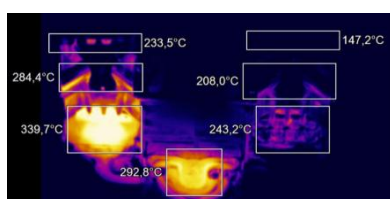

<https://rovalma.com/>

With our knowledge and experience, we help with the implementation of only these in production processes with the aim of saving energy, labor and material costs.

Our work path follows from the design, simulation, manufacture, maintenance, repair and protection of tools made of Rovalma steels.

With our knowledge and preparation for 3D scanning, temperature measurement and controlled cooling devices, we are introducing innovative technological approaches to temperature control in tools, for all metal and other materials transformation technologies.
